

Registration	Student course registration	The patterns of previous students who were taking various subjects	Predicting what type of students are most likely to take particular type of subjects	Prediction
		Association of studentto the most appropriate subject	Associating student with various type of subject	Association
		Classification of studentto the most appropriate subject	Classifying student to the most appropriate subject during their studies	Classification
Performance	Student performance	Association of studentperformance with CGPA	Associating student performance with CGPA	Association
		Association of studentperformance with their academic attitude	Associating student performance with their academic attitude	Association
		Association of studentperformance with project mark	Associating student performance with project mark	Association
		Association of student performance with lecturer satisfaction	Associating student performance with lecturer satisfaction	Association
		Association of studentperformance with planned course	Associating student performance with planned courses (Timetable, sequence of courses)	Association
		Association of student attendance with class situation	Associating student attendance with class situation (Time, Venue)	Association
		Association of student course mark and time and venue of classes	Associating student course mark with class situation (Time, Venue)	Association
		Association of studentlocation with time and venue of class situation	Associating student location with class situation (Time)	Association
		Association of student location with class attendance	Associating student location with class attendance	Association
		Classification of studentto the time and venue of various classes	Classifying student to the most appropriate time and venue for various classes	Classification
		The success pattern of high performed student who are having low CGPA	Predicting the likelihood of high performed student who are having low CGPA	Prediction
		The success pattern of high performed student which are having bad attitude	Predicting the likelihood of high performed student which are having bad attitude	Prediction
		The success pattern of good performed student with low lecturer satisfaction	Predicting the likelihood of good performed student with low lecturer satisfaction	Prediction
	Lecturer performance	Association of lecturer who are not teaching well with student test score	Associating lecturer who are not teaching well with student test score	Association
		Association of lecturer who cancel the class frequently with student test score	Associating lecturer who cancel the class frequently with student test score	Association
		Association of lecturer performance with their attitude	Associating lecturer performance with their attitude	Association
		Association of lecturer personal information with his/her performance	Associating lecturer personal information and his/her performance in the class	Association
		Association lecturerbackground and his/her performance	Associating lecturer performance with his/her background	Association
		Associating lecturerwith course background	Associating lecturerwith course background	Association
